

Good evening;

I am writing to the Planning Commission with a few questions for Mr. Sam Rodgers.

I have read your site plan and I have a few questions. In your section UDO 5.16 you mentioned that IDEM gave the site regulatory closure on 2/9/16.

You mention that a Phase 1 & Phase 2 ESA was done. What was the date that this testing was done? Will you make the results available to the public?)

It has been stated that you have done soil borings on the property, who did it, when did you do it and will you make the findings public?

My last question is for the Planning Commission:

If the adjacent property was remediated and is safe, why was our local Parks Department denied the request to build a dog park adjacent to the property?

I appreciate you taking the time to address my concerns.

Kindly,

Carrie Ridgeway
